What's New In?

Multiple Object Support: Rapidly add, move, or rotate objects to any layer or group (video: 1:15 min.) Revert to Previous Layer: Reset the last used view or layer. (video: 1:05 min.) Map: Supercharge AutoCAD's map feature with the ability to import shape files, turn polygons into meshes, and search for placemarks. (video: 1:03 min.) Multiple Documents: Work on multiple drawings without having to save and reload. (video: 1:13 min.) Shapewire Shapes: Shapeways is one of the most popular and powerful ways to create and share 3D objects. Now, you can import 3D files directly from Shapeways into your AutoCAD drawings, and automatically assign metadata and tags to the imported data. (video: 1:24 min.) Shape Filters: Find the exact layer, view, or object you want, then easily filter shapes by shape, type, size, placement, or other criteria. (video: 1:11 min.) Smart Grid: Send work orders directly to your CAD operators, who can use AutoCAD's new Task Analysis function to quickly and easily provide feedback. (video: 1:21 min.) Help Topics: Get more help and update your help files. (video: 1:05 min.) What's new in Revit 2020: We are delighted to be releasing Revit 2020 and the new interface together. Many of the features of 2020 are better explained in the interface, including easily change your active view, instantly publish or distribute your projects, and automatically sync your project to the cloud, ready to work from anywhere. (Video: 2:40 min.) Multiple Object Support: Add, move, and rotate elements to any view or drawing. Just type to insert an object, then use the directional arrow keys to change the view, or press the right arrow key to move the object. (Video: 1:20 min.) Classification: Organize your building elements with a unified set of classifications. Import and Export: Import and export Revit families as BIMx files and a single model for interoperability with other software. (Video: 1:43 min.) Adding Metadata
