OpenSaveFilesView User's Review: OpenSaveFilesView User Reviews Download OpenSaveFilesView (10.5 MB) OpenSaveFilesView is the program we always use when we need to keep a detailed list of all the files that we have accessed or saved on our PC. Its intuitive GUI (graphical user interface) makes it quite easy to use and quickly scan our computers for all the files that we have accessed or saved on our machine. Apart from the usual window title, the application displays the creation date and time for each file, its size, its full path, its extension and even its attributes. Furthermore, you can sort the results by accessing the files in the list or their attributes. If you need to filter the files, the program allows you to do so, with just a single click on the column header. The results can also be exported to an HTML file to share it with other users. Furthermore, you can save the list of files in TXT, CSV, HTML or XML formats to save it for later analysis. All in all, OpenSaveFilesView is a simple yet efficient application that you can easily use to keep track of all the files you have accessed or saved on your PC.
