#1. QR Generator is a barcode software that generates QR code for any text. #2. Generate QR barcode using the Google Chart API. #3. Save barcode as PNG, GIF, JPG, JPEG or BMP. #4. Adjust error correction parameters and save image. #5. Easy-to-use interface. #6. Fast and quick. #7. Save to disk. #8. Show Output File Location. #9. Create QR code from text or web page. #10. Generate QR barcode in several languages: English, Spanish, Portuguese, Italian, French, German, Russian, Japanese, Korean, Turkish, Arabic, Vietnamese, Chinese, etc. #11. Generate barcode for web pages, PDF, WORD, DOC, EXCEL, TIFF, JPEG, or PPT. #12. Generate QR barcode for HTML, XML, RTF, URL and HTML code. #13. Support barcode version: 1, 2, 3, 4, 5 and 6. #14. Support language: English, Chinese, Japanese, French, Spanish, Russian, Arabic, Korean, German, Italian, Portuguese, Turkish, Japanese, Thai, Vietnamese, Greek, Indonesian, etc. #15. Support Unicode. #16. Adjust the output quality. #17. Adjust the speed of the program. #18. Connect to Facebook, Twitter, Google Plus, etc. #19. Support ANSI barcode. #20. Generate multiple QR codes at once. #21. Support many styles: Barcode style, BARCODE style, CELLULAR style, QR code style, QR code style with font, QR code style with font and 1D barcode style. #22. Support background color, line thickness, fill color, corner color and radius. #23. Support blank, darken and lighten effect. #24. Support Web page, PDF, web page background, document background, file background, image background, image shadow, text, etc. #25. Support images for QR barcode. #26. Support text-to-speech. #27. Support timer. #28. Support counter. #29. Support smooth scroll. #30. Support movie. #31. Support HTML5 audio tag. #32. Support HTML5

What's New In?

Quick Response (QR) Generator is a handy tool that can help you generate QR barcodes for any of your texts, then save them as image format. It does so using the Google Chart API for barcode creation. Intuitive QR code generator The application allows you to create QR barcodes for any of your texts, making them readable for specialized scanners. QR barcodes have a wide range of uses, such as product tagging or commercial tracking. By generating them, you are able to advertise your products and track them with ease. Furthermore, these type of barcodes is used for convenience-oriented applications aimed at mobile-phone users, which means that people can scan your code using their smartphones, then identify your product with ease. Advanced barcode saving options After creating a code, Quick Response (QR) Generator allows you to save it as an image file. This can be customized to fit your needs, by adjusting the size and picture format, which can be PNG, GIF, JPG, JPEG or BMP. On top of that, you are able to change the error correction parameter for your image. Error correction allows damaged code to still be recoverable and readable. By processing your information through all four levels of error correction(low, medium, quartile and high), you can ensure its consistency even if some of the barcode is missing or is damaged. An overall good QR generator To sum it up, Quick Response (QR) Generator is ideal for quickly generating QR barcodes for your information, which can be advertised or used to tag certain products. Thanks to its minimalistic and user-friendly interface, you can generate barcodes regardless of your computer skills. By downloading, you accept the terms of our License. Product Description Quick Response (QR) Generator is a handy tool that can help you generate QR barcodes for any of your texts, then save them as image format.
