```

### What's New In?

Snapshotter Pro is a software that allows you to take screenshots and thumbnails of web pages or whole websites and convert html or text files to images. It is a visual interface for easy management and watching. The following image formats are supported JPG, GIF, PNG, BMP, TIFF. It has a built-in file browser to view folder contents or open your favorite image programs. A user friendly interface which makes it simple to use. Windows Explorer like "right click,drag and drop" features. A new mini browser designed to make it easy to see which websites are opened on which programs. You can manually select items and copy them to the clipboard. You can drag and drop multiple files and folders to the program at the same time. The default view mode is a list of all open websites. The user can easily switch to the explorer mode to open websites. Snapshotter Pro Functions: 1. Saving process on all websites, you can watch all websites and take a picture when you want. 2. It is easy to save websites to zip archive or HTML document. 3. There is a security option to restrict the automatic snapshots to only one domain. 4. There is an option for you to view a list of snapshots and copy the web pages to your clipboard and email, FTP or other transmission. 5. You can easily watch the closed website by the snapshots. 6. All the settings are saved to user's computer, when you close the program, you can log in again to change them. 7. Snapshotter Pro supports Windows Vista/2000/XP/2003/2008/2012/2012R2, 32 and 64 bit operating systems. What's new in this version: Improved the detection of invalid links in the previews. Fixed an issue where the program would launch into a stuck state when taking a screenshot of a website that was already running. Fixed an issue where selecting a different directory to save in would allow the Save button to be functional even though the directory has not been changed. Fixed an issue where a single image was being saved in the main program window rather than in a dedicated window. Added an option to limit the number of screenshots taken. What's new in previous version: Added a session lock to prevent multiple screenshots from being taken of the same website. Minor bug fixes. Snapshotter Pro 6.3.6.0 + Portable Snapshotter Pro 6.3.6.0 is a useful software. This software is the best software for taking screenshots, capturing the desktop, screenshots, one-click screen grabs, and convert html or text files to images. It is a visual interface for easy management and watching. The following image formats are supported JPG, GIF, PNG, BMP.
