Protect your programs to make them harder for unauthorized users to use. Enable the trial period and generate an unlimited amount of registration keys. Protect your programs with a virtualized path and hardware ID. Free keys

and auto-detect from content. Trial period. Virtualized path. Hardware ID. Splash screen. Watermark. Command line overwrite. More miscellaneous controls. Multi-threaded encryption. License verification. Encrypted registry keys. Encrypted OCX. Supports EXE,

SCR, DLL and OCX files. Built-in keygen and trial generator. Keywords: License type: Commercial License terms: 30 days trial. License limitations: No Minimum required: 30 days Minimum required platform: Windows 7 Minimum required version: No Processor: Intel Memory: 256 MB

RAM Storage: 1 GB available space Graphics: ATI DirectX: Yes Other requirements: Windows 7 Legal: No Customer reviews I already used several tools to protect my files, including the famous TrueCrypt, but none of them were good enough to perform the job I needed. That is, to be able to

generate unlimited keys for users who download my app, so they are not able to get the app without buying it. However, as I did not find something that did the job perfectly, I decided to make my own tool, and I am really pleased with the result. Pros: - The interface is very intuitive. - The

features are extremely useful. - The trial period can be applied to many other applications as well. - I can generate up to 100 keys. - The app is extremely powerful, capable of handling some complex scenarios. - The quality is good. Cons: - It is not free software. - It does not provide an

unlimited number of keys. It's very easy to use, intuitive and powerful. It has a couple of options that allow you to protect your code in a very powerful way. I would not recommend it to experienced users because it is not intuitive, but it's worth a try. I
