Fix Yourself Widget is a little...Q: Send HTML mail from ASP.NET Is there any way to send HTML email from a ASP.NET site with a table in it? Here is my code: MailMessage mail = new MailMessage(); SmtpClient smtp = new SmtpClient(); smtp.Host = "smtp.server.net"; smtp.Port = 587; smtp.EnableSsl = true; smtp.DeliveryMethod = SmtpDeliveryMethod.Network; mail.From = new MailAddress("from@gmail.com"); mail.Subject = "HTML email"; mail.Body = @" Testing "; mail.IsBodyHtml = true; mail.BodyEncoding = System.Text.Encoding.UTF8; A: If you want the emails to be plain-text instead of HTML-email, use the following parameters: mail.BodyEncoding = Encoding.ASCII; mail.Body = @" Testing "; Otherwise, if you want to use HTML-email, then use your HTML-body as is. If the table is not inside of the body then it will be ignored, and the email will simply be a plain-text one. Q: Finding the greatest common divisor

If you click on your computer, you will get the name of the program you are using. When you click on your mouse, you will get the name of your mouse. If you click on the special windows or program, you will get its name. If you click on the special folders, you will get its name. If you click on the page you are in, you will get the name of the page you are in. If you click on the special folders, you will get the names of all the folders in the folder you click on. If you click on the top-right, you will get the name of the page you are on and the menu you are on. If you click on the top-left, you will get the names of all the windows you are on and the menus you are on. If you click on the top-right, you will get the name of the program you are in and the menu you are in. If you click on the top-left, you will get the names of all the programs you are in and the menus you are in. If you click on the top-right, you will get the name of the program you are in and the top menu you are on. If you click on the top-left, you will get the names of all the programs you are in and the menus you are in. If you click on the top-right, you will get the names of all the programs you are in and the menus you are in. If you click on the top-left, you will get the names of all the programs you are in and the top menu you are on. If you click on the top-right, you will get the name of the program you are in and the top menu you are on. If you click on the bottom-left, you will get the names of all the programs you are in and the menus you are in. If you click on the bottom-right, you will get the name of the program you are in and the top menu you are on. If you click on the bottom-left, you will get the names of all the programs you are in and the menus you are in. If you click on the bottom-right, you will get the name of the program you are in and the top menu you are on. If you click on the bottom-left, you will get the names of all the programs you 80eaf3aba8

Just install this cute widget on your Yahoo homepage. It will remind you when is the time to take a break. The idea behind this widget is to use the Yahoo engine, so it will work perfectly on any Yahoo homepage. Features: ⬚ Two modes (or activities) The widget remindes you when is the time to take a break in two modes: 1: To take a break, you have to click on the button in the widget. Then the game will start and you have to try to fix all the broken things around you. When you click on a broken object the game will close. 2: To relax, you don't have to click on any button. When you get enough points you'll be able to see a video of a relaxation session. ⬚ Unlimited additional activities There are lots of other activities you can do while playing the game, such as: - To fix things on your desktop. - To fix what is the time on your watch. - To change the windows wallpaper. - To buy new games. - To go to a game site. - To watch a video. - To play games. - To try a new browser. - To watch movie trailers. - To play music. - To play a new funny video. - To play a new clip. - To play a new song. - To play a new game. - To play a new funny clip. - To play a new video. - To go to the Google. - To buy new things. - To buy more games. - To read more blogs. - To read a new article. - To try a new game. - To read a new story. - To play a new song. - To watch a new funny video. - To play a new clip. - To play a new game. - To play a new song. - To go to a new video site. - To watch a new movie. - To read a new article. - To play a new song. - To read a new story. - To play a new game. - To watch a new funny video. - To play a new clip. - To play a new song. - To go to a new site. - To read a new story. - To play a new song. - To play
