Handbook of horticulture [2017]. Category:Handbooks Category:Agricultural booksCircus Thriller (album) Circus Thriller is an album by Paul Horn, released in 1984. It was nominated for a Grammy Award for Best New Artist.

Background The album contains what has been described as Horn's "most melodic and acoustic-sounding" work. Horn plays the piano, bass, and sings and plays harmonica on most tracks, with saxophonist Jim Horn and trumpeter Bill Evans on three tracks, and percussionist Dannie Richmond playing tambourine and washboard on three tracks. Horn had previously worked with Evans in the studio on horns and keyboards, and had previously worked with Richmond as a sideman, having been introduced to him by drummer Al Foster. Horn had written some of the music that would appear on the album before he ever met Richmond. Horn and his band had a house in the Catskills and while there, Richmond joined Horn for jam sessions. Reception Writing for Allmusic, critic Thom Jurek wrote of the album "This album shows Paul Horn to be a much more accomplished and "big picture" player than was previously evident... Circus Thriller marks the beginning of a new era for Paul Horn and I for one welcome the forward movement that Paul Horn has made on this and his other releases." Track listing "Circus Thriller" (Paul Horn) – 6:04 "Dixie" (Traditional) – 3:05 "Bein' the Blues" (Horn) – 4:36 "California Blue" (Horn) – 3:48 "Waltz of the Sun" (Dannie Richmond, Horn) – 5:30 "Light of the Morning" (Horn) – 4:11 "We Both Do" (Horn) – 4:52 "You Are My Sunshine" (Traditional) – 2:33 "Hindsight" (Horn) – 4:44 "Mother's Eyes" (Horn) – 4:29 "If You Won't Be Mine

The aim of the present work was to study the effect of acute and chronic immobilization on the structural components of nuclei of the preoptic area and medial preoptic nucleus of the hypothalamus in rats. The animals were divided into 3 groups. In group I (control), 4 rats were decapitated immediately after a 1-hour immobilization. In group II (1-hour immobilization), rats were immobilized for 1 hour. In group III (chronic immobilization), 6 rats were immobilized for 1 hour a day during 10 days. In the first group, the total RNA content was decreased in nuclei of the preoptic area of rats immobilized for 1 hour. In the group III, the total RNA content was decreased in nuclei of the preoptic area of rats immobilized for 1 hour a day during 10 days. In the medial preoptic nucleus, the total RNA content in nuclei of immobilized rats was decreased both after 1-hour and chronic immobilization. The nuclear proteins content was decreased only in the group of rats immobilized for 1 hour. The total protein content was decreased only in 4bc0debe42
